PROFILE

Computer Engineering student with a strong interest in Software Development, Artificial Intelligence, Automation, and Full-Stack Web Development. Experienced in building AI-assisted applications, automation scripts, web-scraping solutions, and full-stack academic projects using modern development tools.

EDUCATION

Government Polytechnic Sundar Nagar

Himachal Pradesh, India

Diploma in Computer Engineering

2023 – Present

- Relevant coursework: Data Structures, Programming Fundamentals, DBMS, Web Development, Operating Systems, Artificial Intelligence Fundamentals
- Additional Education: 12th Pass – Arts Stream with Computer Science

SKILLS

Technical: Python, Java, C, HTML, CSS, JavaScript, React, Flask, REST APIs, Supabase, PostgreSQL

Automation & Data: BeautifulSoup, Web Scraping, Pandas, CSV/JSON Processing, Automation Pipelines

AI Tools: ChatGPT, Gemini, DeepSeek, AI-Assisted Development

Tools: VS Code, Git, GitHub, Postman

CERTIFICATIONS

- Python Programming Certification — Arrow Education

EXPERIENCE

Python Developer Internship

4 Weeks

- Completed a four-week industrial training program focused on Python programming and software development.
- Developed problem-solving and debugging skills through practical programming assignments.
- Worked on core Python concepts, automation scripts, and application development fundamentals.
- Collaborated on small-scale programming projects and coding exercises.
- Strengthened analytical thinking, software development practices, and programming workflow understanding.

PROJECTS

Smart Campus AI Assistant

2025

- Developed a full-stack Smart Campus platform with role-based access control.
- Integrated attendance, results, announcements, notifications, and AI assistant modules.
- Built automation workflows to improve campus operations and user experience.

AI Assistant & Automation System

2025

- Developed a Python-based AI assistant for workflow automation.
- Integrated multiple AI tools to improve productivity and task management.
- Implemented automation scripts and intelligent workflow features.

Web Data Extraction Tools

2025

- Developed web scraping tools using Python, BeautifulSoup, and Requests.
- Extracted structured data and exported results into CSV and JSON formats.
- Automated data collection and processing workflows.

ACHIEVEMENTS

- Developed multiple AI-assisted automation and full-stack projects.
- Built and deployed a Smart Campus AI platform with role-based functionality.
- Continuously learning Artificial Intelligence, Automation, and Full Stack Development technologies.
